

BIODIESEL

AS PATRIOTIC AS IT GETS!

It's a clean, affordable diesel fuel substitute made from soybeans and recycled cooking oil. It reduces foreign oil dependence, it helps the U.S. farmers, and is a government-approved alternative fuel. It lowers emissions and improves performance in any unmodified diesel engine. Biodiesel doesn't generate any of the air pollutants generally associated with petroleum diesel. It can be blended with any typical diesel fuel to correct many smoke problems. It's biodegradable, and poses minimal concerns to soil and water contamination. It's also non-toxic to plants, animals, and humans.

Fleetline Patriot Biodiesel – A Natural Choice!
