

FLEETPAC™ BULK TANK SYSTEM

The Fleetline *FLEETPAC* Bulk Tank Program is designed for customers of Dennis K. Burke, Inc. who wish to enjoy the benefits of purchasing lubricants in bulk quantities.

In addition to reduced pricing, *FLEETPAC* removes the empty drum problem and creates a clean and safe work environment.

The major difference between our plan and our competitors, is the fact that our plan offers “added value” because you are purchasing the equipment. Others just add on an equipment cost and you receive nothing in return. Also, we offer a complete, modern set-up, inclusive of tank, pump, reel, hose, nozzle and fittings.
